Course Title Marketing Innovation Management
 Course Code EBC4078
 ECTS Credits 6,5
 Assessment None

Period	Start	End	Mon	Tue	Wed	Thu	Fri
5	14-4-2014	6-6-2014	X/E		X/E		

Level Advanced

Coordinator Dominik Mahr For more information: d.mahr@maastrichtuniversity.nl

Language of instruction English

Goals The general objective of this course is to acquire knowledge on how value is created through innovation. While the previous course in the curriculum considered how value is delivered to the market, this course emphasises value creation within a firm. Theoretical state-of-the-art literature provides analytical frameworks as well as managerial guidelines on how value through innovation can be created. You learn how (international) marketing innovations are strategically managed, e.g. the role of marketing in innovation, the innovation process, etc. You are taught about the interaction of marketing with corporate strategy, business design, operations, R&D, human resource management, information systems, etc., i.e. how marketing operations affect and are affected by other organisational functions. Furthermore, you gain knowledge of the input of marketing in several key strategic business processes, e.g. learning, marketing orientation. You develop and strengthen a wide range of skills, including analytical thinking, presentation, writing, and communication skills.

Description This course deals with the management of marketing innovations. Academics as well as practitioners recognise that continuous innovation is critical for competitive survival. An innovation is defined as the development and implementation of new ideas by people who over time engage in transactions with others within an institutional context. Hence, the development of new products, services, and processes involves an integrated set of unique activities. These activities are embedded in interfaces between the marketing function and other firm functions e.g., finance, production, R&D. Furthermore, the marketing function also has to manage collaborations with other firms in the context of joint innovation projects. Hence, this course: (1) helps students to understand the context and content of marketing innovation management and its processes; (2) equips students with hands-on experience on the ways in which marketing operations deal with intra- and inter-functional relationships; (3) provides an insight into the interaction of marketing with corporate strategy and business design.

Literature State-of-the-art literature published in the leading marketing journals. A detailed literature list will be available online (Eleum) at the section course material / group meetings.

Prerequisites All students who are admitted to the Master of Science in International Business can follow this course. Exchange students with a Bachelor degree in Business, or with another Bachelor degree, including a minor in Marketing are also admitted. This course assumes knowledge of innovation management at an introductory level. An advanced level of English
