 Goals Insight in basic economic theories, and the ability to apply them to the real world.
 Description The course 'Economics and Business' introduces economic principles and concepts. The following topics are addressed in lectures and tutorials: supply and demand analysis, perfect competition, monopoly, game theory, oligopoly, agency theory, auction markets, and elements of macroeconomics.
 Literature McDowell, M., Thom, R., Frank, R.H., and Bernanke, B. (2009): Principles of Economics, 2nd European edition, McGraw-Hill.
 Prerequisites Since Economics and Business is a first-year class, the presentation avoids the use of advanced mathematical concepts. However, knowledge of basic mathematical concepts such as solving equations, reading and working with graphs, manipulating inequalities, or working with single-variable functions is an indispensable prerequisite.
 If you feel that you have deficiencies in mathematics, here are two splendid textbooks: (1) Chiang, A.C., & Wainwright, K. (2005): Fundamental Methods in Mathematical Economics"; (2) Sydsaeter, K., & Hammond, P. (2006). Essential Mathematics for Economic Analysis.
