

Course Title	Project and Change Management*
Course Code	EBS4019
ECTS Credits	4,0
Assessment	Pass / Fail

Level	Advanced
Coordinator	Peter Bollen For more information:p.bollen@maastrichtuniversity.nl
Language of instruction	English
Goals	Developing an awareness of the range, scope and complexity of the phenomena, issues and problems

Description	In this skills training students will learn and practice project management skills, such as scoping, planning, financial organisation, et cetera. Project management is necessary for successful innovation, it is not sufficient. Innovation within companies, but also in supply chains, requires organisational change. Failures often result from human resistance to change, rather than from technological problems. Managing change is therefore an important skill that needs to be addressed in the programme. This skills training therefore also addresses change management.
-------------	--
