

## Course Descriptions NonDegree 2015-2016

Course Title Return on Marketing  
 Course Code EBC4081  
 ECTS Credits 6,5  
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
2	26-10-2015	18-12-2015	X/E			X/E	

Level Advanced

Coordinator Marleen Hermans For more information:marleen.hermans@maastrichtuniversity.nl

Language of instruction English

Goals Marketing modelling is the discipline of linking marketing decisions to output measures such as market shares and sales in order to assess the effectiveness of these decisions. The aim of the course is to introduce you to basic marketing modelling. The course has three main goals:  
 1. Acquire the academic knowledge on marketing effectiveness.  
 2. Teach you how to read academic marketing modelling papers.  
 3. Taking first steps in marketing modelling yourself.

Description The importance of the marketing department's role in a firm has been decreasing over the past three decades. As a result, marketing issues are receiving less attention in the boardroom, marketing is often perceived as a cost rather than an investment, and the role of the chief marketing officer (CMO) is under a lot of pressure. One of the main reasons behind this unfortunate trend, is that, in contrast to number crunchers as CFO's, marketing managers are often very little accountable. Indeed, a lot of marketing decisions are still made on the basis of gut feeling without a lot of hard support for the effectiveness of these decisions. Especially in tough economic times, this management style is under a lot of fire.

This is where the art of marketing modelling can come in usefully. Market response models are used to assess the impact of marketing decisions on output measures as sales and market share. Although this discipline already exists in academia for years, a lot of companies still not use marketing modelling, although a lot of data are usually readily available. This course teaches you how to read academic papers that use marketing modelling to assess the impact of marketing decisions, and will also learn you how to build a good (basic) market response model yourself. As a result, you will learn how to make marketing investments more accountable, which will improve your position as an (accountable) marketing manager.

Literature The literature will consist of a bundle of academic papers and book chapters. A detailed literature list will be available on the Eleum site of the course

Prerequisites All students who are admitted to the Master of Science in International Business can follow this course. In the assignments, students will have to use regression analysis and SPSS. So a background in regression analysis and SPSS is necessary.

Teaching methods PBL / Presentation / Lecture / Assignment / Groupwork
