This includes demonstrating an open mind, proactive behaviour, critical reflection and accountability.</p> <p>Graduates can effectively function in a multicultural environment and work in multicultural teams. This includes demonstrating interpersonal skills and a high proficiency of English.</p> <p>Graduates show social responsibility. This includes demonstrating awareness for academic and scientific responsibility in a broader social or ethical context.</p>							
Description	<p>The area of internal control and accounting information systems concerns the quality of (financial) information. As a result of recent corporate financial scandals, this has become a significant issue in today's business. Every business needs a control system that monitors the effectiveness and efficiency of operations, reduces the risk of asset loss, and helps to ensure the reliability of financial reporting and compliance with laws and regulations. The course Internal Control &amp; Accounting Information Systems is an introduction into the key concepts and techniques of internal control, such as information quality, the COSO control framework, IT controls and organisational controls. Based on these concepts and techniques, the course addresses the design of effective and efficient internal controls for the purchasing, inventory, production and sales activities of businesses.</p>							
Literature	<p>Vaassen, E.H.J., Meuwissen, R.H.G., and Schelleman, C.C.M. 2009. Accounting Information Systems and Internal Control. Chichester: John Wiley &amp; Sons.</p> <p>Committee of Sponsoring Organizations of the Treadway Commission (COSO). 2013. Internal Control - Integrated Framework. AICPA, Durham, NC, USA.</p>
