

Course Descriptions Master 2018-2019

Course Title Project: Economics case studies

Course Code EBP4003

ECTS Credits 5,0

Assessment None

| Period | Start | End | Mon | Tue | Wed | Thu | Fri |
|--------|-----------|----------|-----|-----|-----|-----|-----|
| 4 | 4-2-2019 | 5-4-2019 | | | | | X |
| 5 | 15-4-2019 | 7-6-2019 | | | | | X |

Level Advanced

Coordinator Trudie Schils For more information: t.schils@maastrichtuniversity.nl

Language of instruction English

Goals After successfully finishing the project, students will be able to:
 * apply knowledge of economic theory, approaches, perspectives, and methodologies to real-life problems and/or policy issues.
 * independently acquire new knowledge and skills which are relevant for tackling an economic problem.
 * translate a general problem into a specific (research) question, and make use of a relevant approach to obtain an answer.
 * communicate the outcomes of the analysis in general and the proposed solution in particular.

Description The project aims to give students a challenging opportunity to increase their knowledge of Economics and apply it to solve important economic problems/challenges. After a common introductory part, students will work in teams, tackling a particular case, relevant to a real-life economic decision maker (be it a business, a government, or a non-government organization). In case of a project involving a company for example, the goal is to provide an analysis of and/or a solution to the problem that the organisation in question could further develop and implement. Students are encouraged to use a wide range of methods and techniques including data analysis, theoretical modelling, simulation, experiments, etc.
