Course Descriptions Master 2019-2020

Course Descriptions Master 2019-2020								
Course Title	Global Banking							
Course Code	EBC4060							
ECTS Credits	6,5							
Assessment	Whole/Half Grades							
Period	Period 2	Start 28-10-2019	End 20-12-2019	Mon X	Tue	Wed	Thu X	Fri
Level	no level							
Coordinator	Dirk Broeders For more information:d.broeders@maastrichtuniversity.nl							
Language of instruction	English							
Goals	Students will learn about the formal background of the banking sector and its interaction with financial markets and monetary policy. Students will learn why the banking sector is particularly vulnerable to systemic risk and how regulation aims to reduce this. Students will also study the impact of technological innovation on the banking sector (fintech). The approach will both be theoretical (models) and empirical (econometric approach).							
Description	The Global Banking course covers four main topics. First, students will learn about the formal background of the banking sector in the world. Globalisation of financial markets and the banking sector is proceeding at a rapid pace. This is caused by the liberalisation of international capital flows and the promotion of a unified market for financial services in Europe. Second, we study the interaction of the banking sector with financial markets and monetary policy. We will, amongst others, see that banks play an important role in monetary policy transmission. Third, students will understand the nature of systemic risk and why the banking sector is particularly vulnerable to this. We will go through the key regulatory initiatives to reduce systemic risk. Fourth, students will study the impact of technological innovation on the banking sector in the near future. Innovation is one of the most prominent developments affecting the banking sector in the near future. Innovation carries both opportunities and risks for established and new financial institutions and for the financial sector as a whole. The approach in the course will both be theoretical (models) and empirical (econometric approach).							
Literature	to be announced							
Prerequisites	Second-year finance course or second-year course international monetary economics Exchange students need to have obtained a Bachelor degree in economics or business administration. Exchange students need to major in finance in their Master.							
Teaching methods	PBL / Presentation / Lecture / Assignment							
Assessment methods	Written Exam
