

## Course Descriptions Bachelor 2023-2024

Course Title	Linear Algebra							
Course Code	BENC1004							
ECTS Credits	5,0							
Assessment	Whole/Half Grades							
Period	Period	Start	End	Mon	Tue	Wed	Thu	Fri
	2	30-10-2023	15-12-2023		X		X	L
Level	no level							
Coordinator	Martijn Boussé For more information:m.bousse@maastrichtuniversity.nl							
Language of instruction	English							
Goals	<p>* Students have the knowledge on the fundamental concepts of linear algebra, including vectors, matrices, systems of linear equations, eigenvalues, eigenvectors, linear transformations, and orthogonality.</p> <p>* Students will be able to look at the same problem from different angles and they will learn to switch their point of view (from geometric to algebraic and vice versa).</p> <p>* Students will recognize that linear algebra can be applied to problems from different disciplines.</p> <p>* Students will obtain the insight that various seemingly different questions all can boil down to the same mathematical problem of solving a system of equations.</p> <p>* Students can argue (in a sometimes abstract way) which approach may or may not work.</p> <p>* Students are able to give clear arguments to support their solutions in a mathematically correct manner.</p> <p>* Students will be able to understand and write the language of linear algebra.</p>							
Description	This is a course on the study of linear transformations on linear vector spaces. The course introduces these notions both from an algebraic and geometric point of view. Applications such as solving systems of linear equations are discussed. Key concepts are vectors, matrices, linear transformations, eigenvalues, eigenvectors, inner product, orthogonality.							
Literature	* David C. Lay, Steven R. Lay, Judi J. McDonald, (2016), Linear Algebra and its Applications, 5th ed., Pearson, ISBN 978-1-292-09223-2.							
Prerequisites	No prerequisites are required.							
Keywords	Linearity and linear independence, matrix algebra, determinants, vector spaces, eigenvalues and eigenvectors, orthogonality							
Teaching methods	PBL / Lecture							
Assessment methods	Written Exam							
Evaluation in previous academic year	For the complete evaluation of this course please click <a href="http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM">http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM</a>							
This course belongs to the following programme / specialisation	Bachelor Business Engineering			Year 1 Compulsory Course(s)
