

Course Descriptions None 2024-2025 DRAFT

Course Title Project: Economics Case Studies
 Course Code EBP4003
 ECTS Credits 5,0
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
N/A	1-1-1900	1-1-1900					

Level Advanced
 Coordinator For more information:
 Language of instruction English

Goals After successfully finishing the project, students will be able to:
 * apply knowledge of economic theory, approaches, perspectives, and methodologies to real-life problems and/or policy issues.
 * independently acquire new knowledge and skills which are relevant for tackling an economic problem.
 * translate a general problem into a specific (research) question, and make use of a relevant approach to obtain an answer.
 * communicate the outcomes of the analysis in general and the proposed solution in particular.

Description The project aims to give students a challenging opportunity to increase their knowledge of Economics and apply it to solve important economic problems/challenges. After a common introductory part, students will work in teams, tackling a particular case, relevant to a real-life economic decision maker (be it a business, a government, or a non-government organization). In case of a project involving a company for example, the goal is to provide an analysis of and/or a solution to the problem that the organisation in question could further develop and implement. Students are encouraged to use a wide range of methods and techniques including data analysis, theoretical modelling, simulation, experiments, etc.

Literature
 Prerequisites This course has been cancelled
 See the Master Education and Examination Regulations for more information.

The following rule applies to master Economics students, who started the programme prior to academic year 2023-2024.
 TRANSITIONAL REGULATION (EBP4003):
 Register for "Project" (EBP4006) in the new MSc Economics curriculum.
