

Course Descriptions Master 2024-2025 DRAFT

Course Title Corporate Reporting and Internal Decision-Making
 Course Code EBC4262
 ECTS Credits 6,5
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
4	3-2-2025	30-3-2025	X		X		

Level Advanced
 Coordinator Patrick Vorst For more information:p.vorst@maastrichtuniversity.nl
 Language of instruction English

Goals

1. Understand the intuition behind important accounting standards.
2. Critically apply accounting principles to real-life examples.
3. Explain the relevance of external reporting for internal decisionmaking.
4. Evaluate the societal impact of accounting rules.

Description

Financial reporting plays a crucial role in mitigating information asymmetry in capital markets. To make sound investment decisions, such as whether to buy the firm's stocks or bonds, investors rely heavily on accounting disclosures to assess the financial position, performance, and future prospects of a company. Accounting disclosures thus allow capital markets to function and facilitate an efficient allocation of capital by providing investors with relevant information for their investment decisions. Consequently, publicly listed firms around the globe are required to provide periodic updates on their performance, disclosing their earnings, sales, and expenses, alongside other disclosures that provide information relevant to investors.

However, accounting disclosures can also affect a company's internal decisions. Investors use accounting information to make investment decisions and the ability of accounting information to inform investors can affect the ability of companies to raise (low-cost) financing. Managers are concerned about how their actions are reflected in their accounting disclosures and how they affect investor perceptions and consequently will incorporate the accounting consequences of their decisions in deciding on the optimal course of action. In addition, managers also use accounting information from their firm and its peers in their decision-making process.

This course bridges the gap between financial and management accounting and provides you with the hands-on knowledge necessary to become a future accounting professional. This course teaches you the relation between information produced for external reporting purposes and the decisions made by management internally. It aims to advance your understanding of financial accounting principles as well as their implications for real decision-making. We further explore the externalities of firm disclosures by looking at the implications of financial reporting for peer firms' real decisions.

Literature

Prerequisites

This course is in transition for the:
 * master Business Research - No specialisation
 * master Business Research - Operations Research
 * master Fiscal Economics.
 See the Master Education and Examination Regulations for more information.

The following rule applies to master Business Research students who started the programme prior to academic year 2024-2025.
