Language of instruction	English							
Goals	<p>The objective of the course is to provide students the opportunity to deepen their awareness and understanding of conceptual frameworks and best (managerial) practices regarding purchasing and supply management, using a mix of 'state of the art' theory and practical examples. More specific the Understand the role of purchasing in supply chain management</p> <p>Understand the potential impact of purchasing on firm performance</p> <p>Learn how to improve the strategic management of purchasing</p> <p>Learn how to improve the integration of purchasing in supply chain management</p>							
Description	<p>The average firm has a purchasing-to-output value ratio of over 60%. Over the past decade, purchasing has won a reputation in many executive boardrooms as a powerful tool for improving profitability and competitive advantage. Strategies that purchasing develops are increasingly considered to assist in achieving the organisation's overall goals and objectives, it is no longer unusual that purchasing managers report directly to the board of directors, or are even member of this board as Chief Purchasing Officers (CPO). Purchasing Management may also significantly impact upon the value creation of the firm through the early involvement of suppliers in, for example, new product development. This course studies how to set up and strategically manage the purchasing function of a firm. In this course, the evolving role of purchasing in large and international firms is examined in detail. The objective is to provide students with a sound conceptual understanding of the challenges faced by purchasing managers in large and international firms. Specifically, this course will focus on the strategic and tactical aspects of purchasing and supply management, such as commodity strategy development (f.e. single vs. multiple sourcing), Buyer-Supplier Relationships, Supplier Development, E-procurement, and how to organise the purchasing function. The course is focused not only on manufacturing but also on service industries, and looks at sourcing both of products and services</p>							
Literature	Arjan van Weele (2014), 'Purchasing and Supply Chain Management', Cengage Learning, London (6th revised edition) ISBN: 978-1-4080-8846-3							
Prerequisites	<p>Apart from the general prerequisites that count for any MSc course, students should have passed intermediate level (Applied) management courses at 2nd or 3rd year BA level of at least 13 ECTS credits.
