

Course Title	Research Design and Methodology for a Thesis: Global Supply Chain Management and Change							
Course Code	EBS4038							
ECTS Credits	4,0							
Assessment	Pass / Fail							
Period	Period	Start	End	Mon	Tue	Wed	Thu	Fri
	3	10-1-2022	21-1-2022	C				
Level	Advanced							
Coordinator	Tjark Vredeveld For more information:t.vredeveld@maastrichtuniversity.nl							
Language of instruction	English							
Goals	The programme is completed by a Master Thesis Project in which you conduct an in-depth study of a supply chain related topic. It provides you with the opportunity to apply your knowledge and skills acquired during the programme to one specific supply chain problem.							
Description	In several sessions, students are guided towards a thesis proposal that offers a solid base to enter the thesis process. Finding a topic, formulating an interesting and workable problem statement, imposing a structure by formulating sub questions, reporting on a first scan of the literature, and finally developing initial research ideas are all covered in these sessions. The skills training is concluded by a session in which all participants give a presentation of their thesis proposal, receiving critical feedback from other students and the tutor.							
Literature	The literature will be announced later.							
Prerequisites	Students who wish to start their thesis must have followed at least two courses.							
Keywords								
Teaching methods	PBL							
Assessment methods	Participation / Presentation
