

Course Descriptions None 2013-2014

Course Title	Equilibrium Theory																
Course Code	EBC4147																
ECTS Credits	6,5																
Assessment	None																
Period	<table border="1"> <thead> <tr> <th>Period</th> <th>Start</th> <th>End</th> <th>Mon</th> <th>Tue</th> <th>Wed</th> <th>Thu</th> <th>Fri</th> </tr> </thead> <tbody> <tr> <td>2</td> <td>28-10-2013</td> <td>20-12-2013</td> <td>C</td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>	Period	Start	End	Mon	Tue	Wed	Thu	Fri	2	28-10-2013	20-12-2013	C				
Period	Start	End	Mon	Tue	Wed	Thu	Fri										
2	28-10-2013	20-12-2013	C														
Level	Advanced																
Coordinator	Giacomo Valletta For more information: g.valletta@maastrichtuniversity.nl																
Language of instruction	English																
Goals	Learn to think about the economy as a system of interacting markets. Understand the notion of equilibrium and its basic welfare properties. Learn about the positive theory of equilibrium and its foundations. Understand general equilibrium models with time, uncertainty, money, price rigidities, and coordination failures.																
Description	The course starts with the familiar treatment of competitive equilibrium, first, and second welfare theorem, and the core. Next important properties of equilibrium like existence, local uniqueness, uniqueness, comparative statics, and tâtonnement stability are studied. We show how time and uncertainty can be incorporated in a general equilibrium model, leading to models with financial markets and overlapping generations, both important building blocks of finance and macroeconomics. The course concludes with a treatment of state-of-the-art topics like time-inconsistent preferences, money, and coordination failures.																
Literature																	
Prerequisites	Microeconomics at the level of Mas-Colell, Whinston and Green; "Microeconomic Theory"																
Teaching methods	PBL																
Assessment methods
