Level	Intermediate																
Coordinator	Ton Storcken For more information:t.storcken@maastrichtuniversity.nl																
Language of instruction	English																
Goals	In this course the student will learn to formally analyse collective decision rules w.r.t. various aspects such as anonymity, Pareto-optimality, neutrality, and strategy-proofness.																
Description	<p>In collective decision-making (e.g., elections) the rules and procedures used to arrive at a decision may have a considerable impact on the final result. Different rules may lead to different decisions. In this course such rules are studied. In particular, desirable properties like Pareto-optimality and non-manipulability are investigated.</p> <p>Some topics are:</p> <ul style="list-style-type: none"> - voting schemes for two alternatives, theorem of May; - voting schemes for more than two alternatives, score rules, veto rules; - Condorcet winners, dictatorial rules, anonymity, neutrality, positive association, impossibility theorems of Arrow, Gibbard and Satterthwaite; - location problems; - strategy-proof division. 																
Literature	Coursebook.																
Prerequisites	A mathematic level comparable to a Bsc Econometrics & Operations Research meets the prerequisites. Exchange students need to have obtained a Bachelor degree and an advanced level in mathematics. An advanced level of English.																
Teaching methods	PBL / Lecture																
Assessment methods	Written Exam
