Goals	Understand the concept of internal control and the relationship with other disciplines. Understand the role of internal control in producing information of high quality and in promoting the efficiency and effectiveness of an organisation's operations. Understand the different control frameworks and how they relate to each other. Learn about the typology of organisations framework and apply this framework to design effective internal control systems for different types of organisations. Learn about current research in the area of internal control.
Description	The area of internal control and accounting information systems concerns the quality of (financial) information. As a result of recent corporate financial scandals, this has become a significant issue in today's business. Every business needs a control system that monitors the effectiveness and efficiency of operations, reduces the risk of asset loss, and helps to ensure the reliability of financial reporting and compliance with laws and regulations. The course Internal Control first discusses some key concepts of internal control, such as the role of information, the COSO control framework, and the typology of organisations framework. Thereafter, based on the typology of organisations framework, the course addresses the evaluation and design of effective and efficient internal controls for different types of organisations. Furthermore, we discuss current research in the area of internal control.
