

Course Descriptions None 2015-2016

Course Title Behavioural Economics
 Course Code EBC2094
 ECTS Credits 6,5
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
2	26-10-2015	18-12-2015	X			X	

Level Intermediate
 Coordinator Andrzej Baranski Madrigal For more information: a.baranskimadrigal@maastrichtuniversity.nl
 Language of instruction English

Goals The goal of the course is to provide the students with the necessary sensitivity when applying theoretical models. After the course students should be able to identify the most important reasons why humans deviate from behaviour predicted by the commonly used model of the homo oeconomicus. Moreover they should be able to understand formal modelling of deviant behaviour.

Description The traditional model of the homo economicus is ubiquitous in microeconomic theory. Economic agents are assumed to be rational utility maximisers with self-regarding preferences and unlimited processing capacities. Common sense and the results of economic experiments show that this is not always the case. Often people behave differently than predicted by theory. In this course, we will deal with the following problem statements:

- 1) When does microeconomic theory apply and when does it lose its predictive power?
- 2) If it does not apply, what concepts and models can be used to either extend or to substitute the current theory in order to describe human behaviour?

Specifically, we will discuss the following issues:

- Non-expected utility theory
- Intertemporal choice
- Social preferences
- Reciprocity
- Levels of analytical reasoning
- The role of mistakes

In addition, we will touch on the following topics:

- Mental accounting
- Heuristics
- Neuroeconomics

Literature There is no one textbook that will cover the course. References and papers will be made available to the students at the beginning of the course.

Prerequisites Microeconomics
 · Ability to think analytically
 · Basic game theory is not necessary but helpful: simple equilibrium concepts such as (pure and mixed strategy) Nash equilibrium and subgame perfect Nash equilibrium.
 · Exchange students need to major in Economics

an advanced level of English

Teaching methods PBL
 Assessment methods Final Paper / Participation / Written Exam
