

## Course Descriptions None 2015-2016

Course Title Theories and models of learning  
 Course Code EBC4102  
 ECTS Credits 6,5  
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
2	26-10-2015	18-12-2015	X			X	X

Level Advanced  
 Coordinator Wim Gijsselaers For more information:w.gijsselaers@maastrichtuniversity.nl  
 Language of instruction English

Goals What is expertise and how is it developed? How do people acquire knowledge and skills (learning)? What are the specific characteristics of adult learning? And how is this related to workplace learning? Students will be trained in using frameworks of Expertise Research which are based on a cognitive psychological perspective. Next Mechanisms of Expertise Development will be examined, explaining how training and practice can leverage expert performance.

Description The present course deals with issues on how human performance is determined by expertise. It centers on the pivotal role of understanding how people learn and acquire expertise in a domain. It represents an effort to develop sophisticated theories and models which can serve as the foundation of training design and delivery, and provide enhanced understanding of the changing nature of work and the strategic value of learning for Organisations. It discusses research on the nature of knowledge, the underlying learning processes, and how learning can be leveraged at multiple levels: individual, team and network. It questions how Organisations can promote expertise as the outcome of motivation, social conditions within an Organisation, and the design and delivery of training.
