

## Course Descriptions None 2015-2016

Course Title Theory of Individual and Strategic Decisions  
Course Code EBC4197  
ECTS Credits 6,5  
Assessment Whole/Half Grades

| Period | Start     | End        | Mon | Tue | Wed | Thu | Fri |
|--------|-----------|------------|-----|-----|-----|-----|-----|
| 1      | 31-8-2015 | 23-10-2015 | X   |     |     | X   |     |

Level Advanced  
Coordinator Elias Tsakas For more information:e.tsakas@maastrichtuniversity.nl  
Language of instruction English  
Goals Participants learn the analytical tools to model and analyse individual and strategic decision problems.  
Description The course introduces the tools which are necessary to model and analyse individual and strategic decisions. Thereby we do not only introduce the canonical theories but also add some non-standard behavioural approaches. In the first part we treat individual decisions (decision theory), in the second part we deal with strategic decisions (game theory).  
Literature Tadelis, S. (2013). Game Theory: An Introduction. Princeton University Press  
Prerequisites There is no formal prerequisites. However students are expected to have a minimum level of familiarity with basic undergraduate mathematics and statistics.  
Teaching methods PBL / Lecture / Assignment  
Assessment methods Participation / Written Exam  
Evaluation in previous academic year For the complete evaluation of this course please click <http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM>  
This course belongs to the following programme / specialisation
