Course Descriptions None 2017-2018

Course Title	Management Control
Course Code	EBC4154
ECTS Credits	6,5
Assessment	None

Period

Period	Start	End	Mon	Tue	Wed	Thu	Fri
5	16-4-2018	8-6-2018	X/E			X/E	

Level	Intermediate/Advanced
Coordinator	Christoph Feichter For more information:c.feichter@maastrichtuniversity.nl
Language of instruction	English
Goals	After you have finished this course, you will have a good understanding of at least three themes. First, you will be able to understand and discuss the meaning and importance of management control as a basic part of managerial activity. Second, you will be able to understand and assess the interaction between control problems and organisational arrangements, such as performance measurement and incentives. Third, you will have obtained skills to adequately address control problems in actual practice. Graduates have profound, evidence-based and up-to-date academic knowledge and understanding of theories, methods and tools in business/economics. This includes demonstrating the ability to develop new ideas. Graduates can apply their profound knowledge and understanding to identify and solve also unstructured or semi-structured real life business/economic problems in unfamiliar environments within broader multidisciplinary contexts. This includes demonstrating analytical skills and a problem-solving attitude.
Description	The central question of this course is: 'How do managers control the parts of the organisation they are responsible for?' In other words, we are interested in how managers make sure that organisational participants behave and perform in line with the organisation's objectives. Management Control is an essential managerial task. In this course we will deal with the following questions: What control problems do we observe in practice? In what way can these control problems be solved? What are the effects of management control systems? How can we design and implement adequate management control systems?
Literature	Merchant, K.A. and Van der Stede, W.A., Management Control Systems: Performance Measurement, Evaluation and Incentives, Prentice Hall, 3rd edition, 2012.
