Language of instruction	English
Goals	Learning outcomes: major insights in to the state of the art in academic research related to economics and business aspects of innovation Competences: ability to critically assess quality and implications of academic research in the area. Ability to understand and use relevant research methods in the field.
Description	The course deals with business and economic aspects of innovation. It is a joint course of Maastricht University and the University of Leuven, with course sessions organized in both universities. The course consists of seven intensive afternoon sessions and is taught by lecturers who are all known experts in the field of innovation research and have contributed to the state of the art in their domain. Lecturers and topics may vary across years. Topics cover key issues in innovation such as innovation networks, entrepreneurship and innovation, productivity of R&D, patenting and intellectual property rights, the effectiveness of R&D subsidy and tax deduction policies, organizing for innovation in large firms, and the role of science in stimulating business innovation. The course requires considerable preparation and involves critical reading of scientific articles and mastering state of the art quantitative research methods. Evaluation is based on written post-class assignments and in-class participation.
