

Course Descriptions None 2019-2020

Course Title	Life Insurance II							
Course Code	EBC4120							
ECTS Credits	6,5							
Assessment	Whole/Half Grades							
Period	Period	Start	End	Mon	Tue	Wed	Thu	Fri
	5	14-4-2020	5-6-2020	X			X	
Level	Advanced							
Coordinator	Antoon Pelsser For more information: a.pelsser@maastrichtuniversity.nl							
Language of instruction	English							
Goals	To become acquainted with statistical models that can be used in life insurance.							
Description	<p>The course provides students with statistical models that are useful in life insurance (many of these models are also used in other fields that are concerned with future lifetimes of individuals or groups such as biostatistics, epidemiology or public health planning). We first discuss methods to model mortality rates for a larger group or an entire population. A particular focus is on the Lee-Carter model and its extensions. We also learn how to estimate these models. Afterwards we turn to models that are appropriate to model the future lifetime of individuals. A focus will be on models that can incorporate covariates such as parametric regression models, the Cox model and the accelerated failure time model. We also address the multiple decrement model. Subsequently, we discuss how these models can be used to set premiums for life insurance products. In the last part of the course we introduce a model that allows to calculate premiums for insurances that may provide benefits depending on the current status of the insured. As part of the course students will also apply the methods introduced to real data.</p>							
Literature	Research articles, the slides of the course.							
Prerequisites	Probability Theory and Mathematical Statistics.							
Teaching methods	PBL / Presentation / Lecture / Assignment							
Assessment methods	Final Paper / Participation / Written Exam							
Evaluation in previous academic year	For the complete evaluation of this course please click http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM							
This course belongs to the following programme / specialisation	Master Econometrics and Operations Research - Actuarial Sciences		Compulsory Course(s)					
	Master Econometrics and Operations Research - Econometrics		Elective Course(s)					
	Master Econometrics and Operations Research - Mathematical Economics		Elective Course(s)					
	Master Econometrics and Operations Research - No specialisation		Elective Course(s)					
	Master Econometrics and Operations Research - Operations Research		Elective Course(s)					
	SBE Exchange Master		Master Exchange Courses					
	SBE Non Degree Courses		Master Courses
