

## Course Descriptions None 2020-2021

Course Title Economic Growth and Institutions  
 Course Code EBC2013  
 ECTS Credits 6,5  
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
4	1-2-2021	26-3-2021		X	L		X

Level Intermediate  
 Coordinator Christian Kerckhoffs For more information:c.kerckhoffs@maastrichtuniversity.nl  
 Language of instruction English

Goals Develop basic historical knowledge about the process of productivity growth since the Middle Ages.  
 - Introduction to the standard neoclassical (Solow) growth model and some augmentations, and basic endogenous growth models.  
 - Applying empirical techniques to analyse the process of productivity growth.

Description PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. THE INFORMATION PROVIDED HERE IS BASED ON THE COURSE SETUP PRIOR TO THE CORONAVIRUS CRISIS. AS A CONSEQUENCE OF THE CRISIS, COURSE COORDINATORS MAY BE FORCED TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS. While the business cycle is a short-run phenomenon, productivity growth is fundamentally a long-run phenomenon. Therefore, this course takes a long-run, comparative view on the relationship between economic growth, productivity and global economic leadership.  
 In week 1, we have a closer look at the phenomenon 'productivity' and its measurement, and we briefly discuss the shifts in economic leadership during the past millennium. At this stage, our discussions are mostly verbal and empirical.  
 In week 2, we switch gear to a more theoretical approach, starting with an extensive discussion of the neoclassical growth model or Solow model. Since this model fails to provide convincing answers to some important questions, we augment it in week 3: and in this context we also discuss the so called convergence debate, mainly an empirical issue.  
 In week 4, we have a closer look at endogenous growth models. We continue this discussion in week 5, where we also address the growth issue at a deeper level of causality than normally expected in an economics course: this in fact brings us back to the historical analyses discussed in week 1.  
 In weeks 6 and 7, we will use our tools to get back to the issues discussed in week 1: why did modern economic growth only start so recently, and why in Europe? Additionally, we will use our tools to have a look at the "sustainability" debate.  
 While Jones constitutes the backbone of the course, we sometimes take time out to have a closer look at empirical studies by other authors, who invariably use either the Maddison dataset, or the Summers and Heston dataset. Additionally, we occasionally dig more deeply into specific theoretical models, and also address more verbal, historical analyses.

Literature C.I. Jones D.Vollrath (2013), Introduction to economic growth, 3rd edition, W.W. Norton & Company or a more recent edition  
 Selected chapters from 5 additional books, and 5 original articles from scientific journals.

Prerequisites - Knowledge and understanding of introductory microeconomics and macroeconomic (comparable to courses Microeconomics, code EBC1010/1011/1012, and Macroeconomics, code EBC1018/1019/1020).  
 - Knowledge and understanding of mathematical and statistical techniques at an intermediate level, especially differential equations / dynamic systems and regression analysis (comparable to course Quantitative Methods III, code EBC2011).  
 - Exchange students need to major in economics.  
 An advanced level of English

Teaching methods PBL / Presentation / Lecture / Assignment / Groupwork  
 Assessment methods Participation / Written Exam / Assignment / Presentation
