The purpose of this course is to study how investors (both retail and institutional) construct and manage portfolios. We follow the investment process investors follow in real life. That is from Asset Liability Management to Strategic and Tactical Asset Allocation to Portfolio Management, Security Selection and finally Trading. Each week we study a different asset class. Next to traditional assets like listed stocks we look at the added value of real estate, mutual funds, hedge funds and private equity in order to build diversified portfolios. Finally the course will introduce you to a new development in professional asset management; Socially Responsible Investing (SRI). We study the impact of SRI on portfolio return and risk. All topics are explored via real life cases using actual data.
