 The majority of SMEs are owned and controlled by members of the founding-family, and this type of control is associated with various distinctive advantages and challenges. This course addresses the importance and distinctive nature of these enterprises, and familiarizes students with central theories (e.g., socioemotional wealth theory, agency theory, stewardship theory) and topics (e.g., succession, governance, entrepreneurship and innovation) covered in the academic literature on founding-family ownership and control. While the focus of this course is on examining how founding-family ownership influences business practices, comparisons will be made between lone founder firms vs. founder firms with family influence vs. later generation family firms. The course uses a combination of topical readings, presentations, case discussions, and assignments to explore the unique dynamics of these family- and founder-driven enterprises.

Literature Academic journal articles; Case studies
