Goals Students learn how to recognize NP-hard optimization problems, and to formulate them. Moreover, the students learn to select appropriate exact and/or heuristic methods to solve the problems.

Description We introduce complexity theory. We discuss exact optimization algorithms as well as approximate algorithms for NP-hard problems. Students learn how standard techniques from mathematical programming, combinatorial optimisation, and heuristics and search methodologies work, and learn to read research articles and to give presentations on the subjects.

Literature * L.A. Wolsey Integer Programming (2nd edition, 2021),
 Edmund K. Burke and Graham Kendall (eds.) Search Methodologies, Springer, Boston, MA, 2014
 * Various research articles

Prerequisites Game theory and Optimization (EBC4188)
 Teaching methods PBL / Presentation / Lecture / Papers / Groupwork / Coaching
 Assessment methods Attendance / Presentation
