

Course Descriptions None 2022-2023

Course Title	Programming							
Course Code	EBC2016							
ECTS Credits	6,5							
Assessment	Whole/Half Grades							
Period	Period	Start	End	Mon	Tue	Wed	Thu	Fri
	2	31-10-2022	16-12-2022	X	X		X	
Level	Intermediate							
Coordinator	Andre Berger For more information:a.berger@maastrichtuniversity.nl							
Language of instruction	English							
Goals	<p>This course will introduce you to the fundamentals of computer programming. It is designed for students with no prior programming experience. The goals of the course are to learn how to use the fundamental building blocks of a programming language and to get practice in the several steps of algorithm and software development. By the end of the course you should have a strong understanding of the fundamentals of Computer Science and the Java programming language.</p> <ul style="list-style-type: none"> * Students understand the basic principles of computer programming and data structures. * Students apply their programming skills to translate a verbal assignment into computer language. * Students analyse the performance of their solutions through experimentation. * Students select appropriate programming techniques for verbal assignments. * Students explain the structure and methods of their programming solutions. * Students develop programs and discuss these in teams, with the aim of improving programs in terms of clarity and efficiency. 							
Description	<p>PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. A RE-EMERGENCE OF THE CORONAVIRUS AND NEW COUNTERMEASURES BY THE DUTCH GOVERNMENT MIGHT FORCE COORDINATORS TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS.</p> <p>You will first learn the basic principles of programming: data types, variables, statements, assignments, control statements, loops, file input/output, arrays, methods, objects, classes, etc. We will use Java, a high level, cross-platform, and well-constructed computer programming language to demonstrate those principles. Further, you will acquire skills and get practice in the several steps of basic algorithm and software development: from a description of the problem, to an idea about an approach and justified data structures, and finally the translation of the approach into an implemented programme.</p> <p>Formative assessment: Feedback by tutors on programming skills and assignments Summative assessment: Exam and assignments Instructional approach: Lectures, tutorials, and assignments</p>							
Literature	Recommended literature : introductory textbooks on JAVA Programming (examples listed in course manual).							
Prerequisites	Analysis I, Linear Algebra, Optimisation, strong mathematical skills.							
Teaching methods	PBL / Lecture / Assignment / Groupwork							
Assessment methods	Attendance / Participation / Written Exam / Assignment							
Evaluation in previous academic year	For the complete evaluation of this course please click http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM							
This course belongs to the following programme / specialisation	Bachelor Business Analytics				Year 2 Compulsory Course(s)			
	Bachelor Econometrics and Operations Research				Year 2 Compulsory Course(s)
