This means that we define collective decision rules (voting rules, scoring rules, allocation rules), formulate some appropriate properties for these rules, and study their implications. These properties reflect desirable fairness or robustness principles, such as anonymity, efficiency, neutrality, stability, monotonicity, consistency, and manipulability.</p> <p>Topics that we cover include:</p> <ul style="list-style-type: none"> * elections * location problems * bankruptcy problems * bargaining problems * cooperative games
