This course analyses the entrepreneurship and innovation process – moving from startup over scaleup to corporate innovation – using a strategic management lens. For the startup and scaleup setting, it investigates entrepreneurial decision models (e.g., effectuation, lean startup) and strategic and organizational challenges in scaling the business venture. For the corporate setting, it studies crucial decisions in areas like R&D spending, corporate venturing, and patenting, as well as strategic challenges related to ambidexterity and responding to disruptive innovations. This course thus offers an holistic advanced-level overview of entrepreneurship and innovation processes, with deep dives in key focal areas.

Literature Academic articles, practitioner articles, cases.
