This course provides an introduction to the legal structure and design of tax systems. We will first focus on the basic principles of tax systems and elements of the tax base (deductions, attribution of income). There will be a particular focus on taxing personal income (from labour and capital) and corporate income (like interest, royalties and dividends). We will then address selected issues of doing business abroad like double taxation as well as taxation of cross-border workers. Basic anti-tax-avoidance legislation will also be addressed as will elements of European (tax) law. This course will not focus on any country in particular, allowing this to be a real principle-based and comparative course.
