Course Title	Managing Takeovers																
Course Code	EBS2017																
ECTS Credits	4,0																
Assessment	Pass / Fail																
Period	<table border="1"> <thead> <tr> <th>Period</th> <th>Start</th> <th>End</th> <th>Mon</th> <th>Tue</th> <th>Wed</th> <th>Thu</th> <th>Fri</th> </tr> </thead> <tbody> <tr> <td>3</td> <td>15-1-2024</td> <td>26-1-2024</td> <td>C</td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>	Period	Start	End	Mon	Tue	Wed	Thu	Fri	3	15-1-2024	26-1-2024	C				
Period	Start	End	Mon	Tue	Wed	Thu	Fri										
3	15-1-2024	26-1-2024	C														
Level	Intermediate																
Coordinator	Sanne Jongen For more information:s.jongen@maastrichtuniversity.nl																
Language of instruction	English																
Goals	Mergers, takeovers and restructuring have become commonplace phenomena in the new economy and force companies to grow larger. A recent example is the 85 bln USD Dollar takeover of Time Warner by AT&T. The question is whether these takeovers actually create value for the firm.																
Description	<p>Mergers, takeovers and restructurings have become commonplace phenomena in the economy. They enable companies to grow larger, and encourage corporate managers to keep their businesses run properly. Relatively prominent examples in recent decades include the Kraft-Heinz, Disney-21st Century and Dow Chemical-DuPont deals. However, takeovers have for decades been surrounded with debates. One question that has been central to this debate is whether takeovers actually create value for the firm, and what are actually the motives of managers to undertake such deals. For example, while companies become larger and appear more 'powerful' after an acquisition, do these transactions actually increase firm value and create more wealth for the shareholders? Thus, the topic of value enhancement is an important one in the context of takeovers and mergers. The purpose of this skills course is to become familiar with Mergers and Acquisitions (M&As) and value-based management perspectives. M&As have become commonplace phenomena in the last centuries. In this skills course you will take part in understanding shareholder value-based thinking in the context of M&As by performing case work that focuses on valuing and assessing takeovers, synergies, leveraged buyouts and option-like deals. The course is an elective skills course for 2nd and 3rd year students from the following studies:</p> <ul style="list-style-type: none"> * Bachelor Economics and Business Economics (specialization: Economics and Management of Information, Economics, International Business Economics) * Bachelor International Business * SBE Exchange Bachelor * SBE Non Degree Courses <p>The course is also open to SBE Exchange Master students. Regular Maastricht University students from the above-mentioned study programs will have the required pre-knowledge. Exchange students need to have taken at least one introductory finance course / sufficient first-year finance skills. Note that this course does not complete with grade but instead with a 'sufficient' statement. This course will make use of Canvas and Problem-Based Learning. The purpose of this skills course is to become familiar with Mergers and Acquisitions (M&As) and value-based management perspectives. After completing the course, you:</p> <ol style="list-style-type: none"> (i) understand how M&As can be valued using common scientifically valid valuation approaches; (ii) develop skills to apply valuation techniques to M&A related investment opportunities; (iii) be able to judge whether M&A's add value; (iv) understand the difference between DCF valuation and real-option approach to valuation. (v) further develop your presentation and communication skills 																
Literature	<p>Selection from: •Berk, J. and DeMarzo, P. (2017). Corporate Finance. Global Edition. Pearson. oChapter 8: Fundamentals of Capital Budgeting oChapter 18: Capital Budgeting and Valuation with Leverage oChapter 19: Valuation and Financial Modeling: A Case Study oChapter 20: Financial Options oChapter 21: Option Valuation oChapter 28: Mergers and Acquisitions •Bruner, R. F. (2004). Applied mergers and acquisitions (Vol. 173).
