Goals	This skills training is designed to help students learn the basics of SPSS for Windows and aims at getting the students acquainted with the functionality and possibilities of the latest version of SPSS.																							
Description	This skills training is designed to help students learn the basics of SPSS for Windows and aims at getting the students acquainted with the functionality and possibilities of the latest version of SPSS. The students will, by means of different data sets, get a guided tour through different modules in order to understand its data handling/transformations and some built-in functionality of the statistical routines.																							
Literature	The manual and all other information will be available on "My Courses" in the Student Portal.																							
Prerequisites	Statistics of quantitative methods I and II (to be able to interpret the statistical outputs of SPSS). An advanced level of English.																							
Teaching methods	PBL / Assignment / Skills																							
Assessment methods	Attendance / Written Exam
