Language of instruction English

Goals The purpose of this course is to provide an understanding of the psychological underpinnings of the behaviour of individuals and the effect that has on financial markets and the financial decision making processes in corporations.

Description Traditional finance literature is based on the assumption of rational and omniscient investors who optimize the risk/return profile of their portfolios. This approach has merits in the development of theoretical foundations like the Capital Asset Pricing Model and the Arbitrage Pricing Theory for a stylized world with efficient markets. However, treating investors as being utility optimizing, omniscient, and unboundedly rational individuals, sets limits to understanding and explaining real-life investors' behaviour. The limitations of traditional finance are well-known in the field of behavioural finance and the extant literature in the latter field has contributed to understanding many facets of both micro level individual investor as well as macro level stock market behaviour that were inexplicable from a traditional finance perspective. behavioural finance is a relatively new discipline that studies how psychology affects finance. This course serves to provide a broad overview of what constitutes behavioural finance and how its findings may be used to better understand and possibly improve both the financial decision-making behaviour of individual investors as well as that of corporate executives and provides first insights in how we may apply this knowledge when developing financial products.

Literature There will be a opening lecture.
 Both a textbook and a collection of articles will be used:
 Textbook:
 Statman, Meier, 2017, Finance for Normal People - How Investors and Markets Behave, Oxford University Press

Articles:
 A selection of later to be announced scientific articles will be used.

Prerequisites This course is in transition for the master Business Research.
 See the Master Education and Examination Regulations for more information.

The following rule applies to master Business Research students who started the programme prior to academic year 2024-2025.

TRANSITIONAL REGULATION (EBC4053):

The master Business Research has been discontinued.

Courses of the Business Research master's programme will continue to be offered until and including academic year 2025-2026 with exam opportunities running until and including 2026-2027.

PREREQUISITES:

Courses and workload are very demanding for all IB Master courses. Exchange students need to have obtained a Bachelor degree in business. Exchange students need to major in finance in their Master.

Students are expected to understand the basics of CAPM and portfolio choice as well as financial markets and investor behaviour.

Teaching methods PBL / Presentation / Lecture / Papers / Groupwork / Research

Assessment methods Final Paper / Participation / Written Exam / Presentation
