

## Course Descriptions None 2024-2025

Course Title Advanced Macroeconomics  
 Course Code EBC4234  
 ECTS Credits 5,0  
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
2	28-10-2024	15-12-2024					

Level Advanced  
 Coordinator Mark Sanders For more information:m.sanders@maastrichtuniversity.nl  
 Language of instruction English

Goals The goal is to understand the sources of economic growth and of growth rate differentials between countries. We use modern growth theory but also catching-up theory to shed light on these issues, and we use international macro-data to identify and quantify aforementioned international growth differentials between (clusters of) countries and tendencies for convergence and/or divergence within and between clusters of countries. Students will develop a deep understanding of the relationship between economic growth and distribution issues and the policies affecting these.

Description In this course you will familiarize yourself with the state of the art in our thinking about the big macroeconomic questions of our time. This starts with a rigorous review of textbook knowledge but needs to go beyond this. We will carefully read and discuss the models that have shaped the field and our thinking about key questions in modern macroeconomics. At the end of the course students will:

- \* Know and be able to work with classic models in macroeconomics
- \* Have shown an active command of such models and their empirical implications
- \* Derive testable hypotheses and set up empirical strategies for testing them
- \* Write a clear and concise academic paper on a macroeconomic topic
- \* Elaborate on the scientific and policy implications of their work
