

## Course Descriptions None 2024-2025

Course Title Market Regulation and Competition Policy  
 Course Code EBC4239  
 ECTS Credits 5,0  
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
4	3-2-2025	30-3-2025					

Level Intermediate  
 Coordinator Marco Catola For more information:m.catola@maastrichtuniversity.nl  
 Language of instruction English

Goals The goals are threefold. The first goal is to develop an understanding of when and how markets fail to reach an efficient outcome, and how such market failures can result in the need for regulatory intervention. Participants will learn to identify market failures and to critically assess the policy implications and responses that result. The second goal is to introduce game-theoretic methods that are used in modern industrial organization. The third tool is to apply these methods to the analysis of competition policy.

Description The course starts by reviewing key concepts in the classical theory of regulation -such as monopoly pricing, externalities, the provision of incentives to innovate- and the common regulatory responses. Game theoretic models of firm behaviour, such as price competition by firms in oligopolistic market, are discussed next. Following the development of the analytical toolkit, the course turns to the analysis of competition policy: competition policy aims at maintaining or improving competitive interactions in market economies. The course assesses the pro-competitive effects of existing antitrust legislations, and introduces empirical methods to determine relevant markets, to analyse market power, and to detect collusive and abusive conduct. These ideas are applied to a number of real cases, such the telecommunications industry and the music/software industry.

Literature \* Viscusi, W.K., Harrington, J.E., and Vernon, J.M.(2005), , Economics of Regulation and Antitrust, MIT Press.  
 \* Walter Nicholson and Christopher M. Snyder, Microeconomic Theory (2002): Basic Principles and Extensions, South-Western.  
 \* Research papers

Prerequisites This course is in transition.  
 See the Master Education and Examination Regulations for more information.  
 The following rule applies to master Economics students who started the programme prior to academic year 2023-2024.  
 Specifically, those with one of the following specialisations/majors:  
 \* Market Regulation and Design  
 \* No specialisation  
 TRANSITIONAL REGULATION (EBC4239):  
 In 2024-2025 students are allowed to repeat the examination and resit.

PREREQUISITES:  
 Game Theory, Probability, Advanced Microeconomics.

Keywords  
 Teaching methods PBL / Presentation / Assignment / Papers / Groupwork / Research / Skills  
 Assessment methods Participation / Assignment / Presentation / Take home exam  
 Evaluation in previous academic year For the complete evaluation of this course please click <http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM>

This course belongs to the following programme / specialisation	Master Economics - Market Regulation and Design	Transitional Regulation
	Master Economics - No specialisation	Transitional Regulation
