4	3-2-2025	30-3-2025	X			X	

Level Premaster

Coordinator Alexander Bruggen, Jeroen Derwall For more information:a.bruggen@maastrichtuniversity.nl; j.derwall@maastrichtuniversity.nl

Language of instruction English

Goals It is the objective of this PREMASTER to introduce students to the scientific approach to business. The course will deal with the role of theory in business research and the underlying characteristics of the scientific approach to business research.

Description The course will discuss the aims of science and the scientific approach using inductive and deductive approaches. Furthermore, the course will address the role of theory in the scientific approach. The course will cover the stages of the scientific method in more detail: (1) defining the problem, (2) develop the theoretical framework and hypotheses, (3) research design, (4) development of measures and data collection, (5) data analysis and (6) Interpretation and reporting. We will apply these principles to academic articles from a number of business disciplines using a critical review approach. Moreover, we will also address the use of suitable qualitative research methods versus quantitative methods.

Literature \* Blumberg, B., Cooper, D. R & Schindler, P.S. (2014). Business Research Methods. MacGraw-Hill.  
 \* Quinlan, C., Babin, B., Carr, J., Griffin, M. & Zikmund, W.G. (2019). Business Research Methods. Cengage.
