

## Course Descriptions None 2025-2026

Course Title Second-year Project II  
Course Code EBS2003  
ECTS Credits 4,0  
Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
6	22-6-2026	3-7-2026	C				

Level Intermediate/Advanced

Coordinator Tjark Vredevelde For more information:t.vredevelde@maastrichtuniversity.nl

Language of instruction English

Goals  
\* Students apply econometrics and operations research techniques to solve problems and cases.  
\* Students learn how to judge the outcomes of their approaches to the case.  
\* Students learn how to interpret the results of their approaches and give recommendations bases on these results.  
\* Students learn how to summarise results in a report and a presentation.  
\* Students learn how to work on complex problems in teams.

Description  
Students work on a practical project related to the courses of the second semester of year 2. In particular, an integrated case that involves both Operations Research and Econometric techniques will be presented to the students. A final paper and a final presentation, gathering both parts, will be used to evaluate students.

Literature Articles.

Prerequisites  
Basic course in programming, basic course in linear programming, basic knowledge of combinatorial optimisation (discrete Operations Research). Econometric Methods 1.

Transitional Regulations

Teaching methods  
Presentation / Assignment / Groupwork

Assessment methods  
Final Paper / Presentation

Evaluation in previous academic year
