

## Course Descriptions None 2025-2026

Course Title	Project: Economics Case Studies															
Course Code	EBP4003															
ECTS Credits	5,0															
Assessment	Whole/Half Grades															
Period	Period	Start	End	Mon	Tue	Wed	Thu	Fri								
	N/A	1-1-1900	1-1-1900													
Level	Advanced															
Coordinator	For more information:															
Language of instruction	English															
Goals	<p>After successfully finishing the project, students will be able to:</p> <ul style="list-style-type: none"> <li>* apply knowledge of economic theory, approaches, perspectives, and methodologies to real-life problems and/or policy issues.</li> <li>* independently acquire new knowledge and skills which are relevant for tackling an economic problem.</li> <li>* translate a general problem into a specific (research) question, and make use of a relevant approach to obtain an answer.</li> <li>* communicate the outcomes of the analysis in general and the proposed solution in particular.</li> </ul>															
Description	<p>The project aims to give students a challenging opportunity to increase their knowledge of Economics and apply it to solve important economic problems/challenges. After a common introductory part, students will work in teams, tackling a particular case, relevant to a real-life economic decision maker (be it a business, a government, or a non-government organization). In case of a project involving a company for example, the goal is to provide an analysis of and/or a solution to the problem that the organisation in question could further develop and implement. Students are encouraged to use a wide range of methods and techniques including data analysis, theoretical modelling, simulation, experiments, etc.</p>
