Level	Introductory/Intermediate
Coordinator	Lissa Melis For more information:lissa.melis@maastrichtuniversity.nl
Language of instruction	English
Goals	* Students are familiar with different problems that occur within operations management. * Students can recognise different problems from the field of operations management, and can select and apply an appropriate solution technique. * Students can give an appropriate interpretation to numbers that result from quantitative solution techniques and suggest appropirate actions. * Students are familiar with operations management practices in industry. * Students can give an appropriate interpretation to numbers that result from quantitative solution techniques. * Students can work in multi-cultural teams to solve operations management problems.
Description	The course focusses on problems and solution techniques in the area of Operations and Supply Chain Management. Covered topics include, among others, facility location, scheduling, multi-objective optimisation and supply chain collaboration. Addressing these topics, several quantitative techniques that have shown to be successful in these areas will be applied on examples and exercises. The course combines cases, exercises and discussions, facilitated by your tutor and the students themselves. Facilitations cover exercises, cases and the reading of research papers.
