

Course Descriptions None 2025-2026

Course Title Statistics and Mathematics for Pre-master
 Course Code EBC2185
 ECTS Credits 6,5
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
4	2-2-2026	27-3-2026	L		X		X

Level Premaster
 Coordinator Matthijs Hermeling For more information:matthijs.hermeling@maastrichtuniversity.nl
 Language of instruction English

Goals Introduction to the matrix representation of (linear) systems of equations, and to the (constrained) maximization or minimization of (nonlinear) functions of more than 1 variable. Introduction to the basic tools of inferential statistics, such as the independent-samples t-test, the paired-sample t-test, one-way-ANOVA, the chi-square test and regression analysis.

Description In the mathematics part, we will expand the analysis of functions and (systems of) equations. Issues that will be addressed are:
 * The matrix representation of systems of linear equations (so called linear algebra) will be introduced and supplemented by the concepts of determinants and inverse matrices, which are important tools to manipulate such systems.
 * The (constrained) maximisation or minimisation of (nonlinear) functions of more than 1 variable, using the Lagrange multiplier method.
 * Further topics include the chain rule, the slope of a level curve, homogeneous functions, and a collection of tools often used in finance but also in other fields (buzzwords: interest rates, present value, discounting, and geometric series).
 All these topics will be introduced and illustrated using economic or business applications, and functions that are often used in these fields (e.g. the Cobb-Douglas production function) will be analysed extensively.

In the statistics part, we will expand the coverage of inferential statistics, i.e. how to draw conclusions about a population based on a sample. Students will learn to apply the basic tools of inferential statistics (confidence intervals and hypothesis tests) to examine a large array of questions that may occur in economics or business. We will focus on the following topics:
 * How to examine whether the mean of some quantitative variable (e.g. income) differs between two or more populations (e.g. men vs. women). Related to this, we will also examine what to do when the data are paired, and when the variable of interest is a proportion.
 * How to analyse relationships between qualitative variables (e.g. between brand preference and gender).
 * How to analyse relationships between two or more quantitative variables (e.g. between income and age) using regression analysis. This is one of the most frequently used statistical techniques in economics and business.
 All these issues will involve the use of real-life data, which will be analysed using EXCEL.

Literature * Sharpe, Norean R., Richard D. De Veaux and Paul F. Velleman (2019), Business Statistics and Extra Texts, 4th ed., New York: Pearson Education International, Maastricht University Edition.
 * QM1 and QM2 Mathematics Readers, to be downloaded on the course pages

Alternatively, students can take EBC2169 "Academic Skills and Competences for Pre-master".From 2024-2025 onwards, the course is cancelled.<table><col style="width: 200px;"><col style="width: 120px;"><col style="width: 120px;"><thead><tr><th>Academic Year</th><th>Education</th><th>Exam/Resit</th><th>Replacement(s)</th></tr></thead><tbody><tr><td>2023-2024</td><td>X</td><td>X</td><td>EBC2169 "Academic Skills and Competences for Pre-master"</td></tr><tr><td>2024-2025 onwards</td><td> </td><td> </td><td> </td></tr></tbody></table></div>

Teaching methods PBL / Lecture / Assignment
 Assessment methods Attendance / Written Exam

Evaluation in previous academic year For the complete evaluation of this course please click <http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM>

This course belongs to the following programme / specialisation	Pre-master Economics	Disciplinary Courses
	Pre-master Economics and Strategy in Emerging Markets	Cancelled - Disciplinary Courses
	Pre-master Financial Economics	Disciplinary Courses
	Pre-master Human Decision Science	Compulsory Courses
