Goals Students will demonstrate that they can apply the knowledge and skills that they have obtained throughout their study by working on a research problem from a specific domain.

Description Students will extend and apply the methods learned throughout their study. They will have the opportunity to specialize in one of the main areas of the programme. Various topics from these fields are proposed to the students that will work on a research project (literature overview, empirical or theoretical analysis in Mathematical Economics, Econometrics, Operations Research, or Actuarial Sciences) under the supervision of a staff member.
