Level	no level																
Coordinator	Robert Suurmond For more information:r.suurmond@maastrichtuniversity.nl																
Language of instruction	English																
Goals	The main objective of the course is to provide students with insight into the complexity of global supply chains. In addition to concepts from supply chain management, the course also makes connections with other domains: legislation, financing, engineering. This emphasizes the transdisciplinary aspect of the program and provides students with tools to deal with complexity in supply chains.																
Description	This course provides a comprehensive exploration of operations and supply chain management (OSCM), teaching students to apply their knowledge to real-world global contexts. The course covers ethical and cultural aspects of globalization, enhances team leadership skills, and offers strategies for mapping, assessing, and optimizing global supply chains.																
Literature	Students are not required to buy a specific book																
Prerequisites	SPARK registration																
Keywords																	
Transitional Regulations																	
Teaching methods	PBL																
Assessment methods
