Goals	This skills training is designed to help students learn the basics of SPSS for Windows and aims at getting the students acquainted with the functionality and possibilities of the latest version of SPSS.																
Description	This skills training is designed to help students learn the basics of statistical software and aims at getting the students acquainted with the functionality and possibilities of the latest version of such software. The students will, by means of different data sets, get a guided tour through different modules in order to understand its data handling/transformations and some built-in functionality of the statistical routines. The skills training accounts for contemporary developments in the availability of open-source alternatives, which are seeing increasingly widespread use.																
Literature	The manual and all other information will be available on "My Courses" in the Student Portal.																
Prerequisites	* Statistics of quantitative methods I and II (to be able to interpret the statistical outputs of SPSS). * An advanced level of English.
