Language of instruction English

Goals In more details, the learning objectives for this course are as follows:

* To acquire theoretical understanding and knowledge of leadership and communication theories and skills.

* To develop your reflective awareness with respect to your own values, assumptions, expectations and beliefs regarding communication and leadership.

* To increase your ability to analyze and transform your own communication and leadership behavior.

Description

Traditional notions of successful leadership and interpersonal skills are increasingly challenged by shifts in workforce expectations, technological disruption (especially robotics and AI), and the need for interdisciplinary collaboration. This course provides students with the theoretical understanding and practical tools necessary to lead and collaborate effectively in this new landscape.

Drawing on the latest insights from behavioral science, management, psychological research, Organisational Leadership and People Skills introduces students to essential leadership and interpersonal competencies with an evidence-based lens. The course combines hands-on experiential learning with academic rigor:

Students will actively engage in role-plays, negotiation and economic games, group discussions, and engage with state-of-the-art technological agents (e.g., AI). They will also work on a reflective leadership journal and develop a creative leadership intervention (e.g., chatbot, podcast, or video) that applies course concepts to real-world challenges.

Topics include influence and persuasion, power and status, trust, empowerment, negotiation, ethical leadership, charisma, and human-AI collaboration. Throughout the course, students will critically reflect on their own leadership behaviors, receive structured peer and tutor feedback, and learn directly from successful (business) engineers in guest lectures.

By the end of the course, students will have sharpened their leadership and people skills with evidence-based methods and be better prepared to thrive as reflective, responsible, and adaptive leaders in today's modern, complex, and dynamic environments. These course-level learning objectives will help students work on the overall learning goals of Maastricht University.
