Language of instruction English

Goals Students obtain basic insight in operations and Supply Chain Management and understand relations with other functions. Students also learn basic project management skills.

Description This course is the introduction course for the business specialisation in supply chain management. Students will require a solid foundations in the topics and tools of both operations and supply chain management. While a strong internal operations function is vital to a firm's survival, it is not sufficient. Firms must also understand how they link in with their supply chain partners. In this course, we will cover a wide range of topics such as supply chain strategy, forecasting, inventory management, purchasing, logistics, JIT/Lean, Quality and Capacity management.

Literature Introduction to Operations and Supply Chain Management: International Edition, 3/E, Bozarth & Handfield, 3rd edition, ISBN-10: 027377008X, ISBN-13: 9780273770084.
