

Course Descriptions Bachelor 2019-2020

Course Title	Information, Markets and Organisations
Course Code	EBC2108
ECTS Credits	6,5
Assessment	Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
5	14-4-2020	5-6-2020		X		X	

Level	Advanced																																												
Coordinator	Stefan Terstiege For more information:s.terstiege@maastrichtuniversity.nl																																												
Language of instruction	English																																												
Goals	(1) Get familiar with the microeconomic theory of uncertainty and information, its conclusions, limitations, and main applications; (2) Acquire a working knowledge of techniques to analyze problems of choice under uncertainty and of asymmetric information.																																												
Description	This course, which falls under the area of mathematical economics and belongs to the Bachelor program Econometrics and Operations Research, gives an introduction to the microeconomic theory of uncertainty and information. In the course, we study basic elements of the role that information plays in the decisions of individuals and firms, as well as in the working of markets. This is done by combining elementary methods of microeconomics with those from elementary probability theory. First, we introduce expected utility maximization, the standard model of choice under uncertainty. We then use this model to study numerous important issues arising from incomplete information, such as attitudes toward risk, demand for insurance, portfolio selection, value of information, (in)efficiency of markets, moral hazard, and adverse selection.																																												
Literature	Bikhchandani, S., J. Hirshleifer, and J.G. Riley (2013), The Analytics of Uncertainty and Information, 2nd edition, Cambridge University Press, Cambridge.																																												
Prerequisites	Prior knowledge in microeconomics equivalent to the course Microeconomics (EBC1012) is essential. Recommended are also the courses Probability Theory (EBC1024), Analysis II (EBC1032), and Game Theory and Economics (EBC2110).																																												
Teaching methods	PBL / Lecture / Assignment																																												
Assessment methods	Written Exam
