

Course Descriptions Exchange 2019-2020

Course Title Empirical Methods in Economics
 Course Code EBC4233
 ECTS Credits 5,0
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
1	2-9-2019	25-10-2019	X			X	

Level Advanced

Coordinator Bart Golsteyn, Erik de Regt For more information: b.golsteyn@maastrichtuniversity.nl; e.deregt@maastrichtuniversity.nl

Language of instruction English

Goals
 * A critical attitude towards the use of data and the empirical methods to analyse real world events
 * How empirical observations can be interpreted and evaluated from an economic point of view
 * Experience in working with Stata

Description
 People who retire earlier, die earlier. Would you conclude from this evidence that it is better not to retire early? This course offers you (1) tools with which you can take a critical look at such claims, (2) tools with which you can investigate data yourself. In case of this example, causality might run in the opposite direction: people who are healthier work longer than those who are less healthy. So decreasing earlier might not be caused by earlier retirement but be due to worse health of early retirees. To estimate whether early retirement really increases health risks we need a better research strategy. This course offers such methods and tools along with assignments to see how it works in practice. It considers both cross-section, time series and panel methods. The course develops an understanding of the main tools with which empirical claims can be established or refuted. The philosophy is to explain the empirical strategies in an intuitive way. We focus on analysing economic phenomena, using applied papers as examples.

Literature
 Chapters from books like:
 * Wooldridge J.M. (2016), Introductory Econometrics, A Modern Approach, 6th ed. Cengage, Mason.
 * Asteriou, D. and S.G. Hall (2016), Applied Econometrics, 3rd ed., Palgrave MacMillan, New York.
 * Söderbom, M. and F. Teal (2015), Empirical Development Economics, Routledge, London/New York.
 * Stock, J. & Watson, M. (2019), Introduction to Econometrics, Fourth Edition, Pearson.
 A reader with articles and background material.

Prerequisites Basic econometrics, some experience with statistical software such as Stata. An advanced level of English.

Keywords

Teaching methods PBL / Lecture / Assignment

Assessment methods Participation / Written Exam
