

Course Descriptions Bachelor 2020-2021

Course Title	Auctions and Electronic Markets
Course Code	EBC2091
ECTS Credits	6,5
Assessment	Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
4	1-2-2021	26-3-2021		X		X	

Level	Intermediate
Coordinator	Dries Vermeulen For more information:d.vermeulen@maastrichtuniversity.nl
Language of instruction	English

Goals
 (1) Being familiar with the game theoretic analysis of classical single-item auctions; (2) get insight in recent and classical auction literature and learn to interpret the main results; (3) be aware of the most important issues of auction design and how they can be addressed in various contexts; (4) learn how to set up an auction design for a particular application.

Description
 PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. THE INFORMATION PROVIDED HERE IS BASED ON THE COURSE SETUP PRIOR TO THE CORONAVIRUS CRISIS. AS A CONSEQUENCE OF THE CRISIS, COURSE COORDINATORS MAY BE FORCED TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS. In order to satisfy the Econometrics & OR curriculum, you have to choose two of the courses EBC2091, EBC2120, EBC2121, EBC2122 in period 4.

The course is divided into three parts. Part (I) deals with fundamental results on single-item auctions under strong assumptions about the bidders and their preferences. It should not be a surprise that this classical theory is by far not sufficient when designing auctions for real applications. For example, in frequency auctions, like the UMTS auctions in Europe, or in reverse auctions used in procurement, many items are sold at the same time. Furthermore, we may face problems like the winner's curse when there is uncertainty about the valuation of the items sold in an auction. Part (II) gives a detailed insight in such issues and how they can be dealt with. In Part (III), theoretical insights from part (I) and (II) are applied to particular markets for which auctions have been proposed, or are already used. We broaden our knowledge thereby by investigating the interaction between auction design and specific properties of the market. Examples of markets are electric power, highway franchising, emission rights, and listings in online search engines. Each student writes a final paper about one of these markets, in which they make proposals for an auction design in these markets.

Literature
 Course book.

Prerequisites
 Exchange students need to major in economics.
 An advanced level of English.

Teaching methods
 PBL / Presentation / Lecture / Papers

Assessment methods
 Final Paper / Participation

Evaluation in previous academic year
