

Course Descriptions Master 2020-2021

Course Title Economics of Labour Markets and Human Capital
 Course Code EBC4092
 ECTS Credits 6,5
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
1	31-8-2020	16-10-2020		X			X

Level no level

Coordinator Didier Fouarge For more information: d.fouarge@maastrichtuniversity.nl

Language of instruction English

- Goals
- Understanding of labour market developments and supply-demand interactions.
 - Understanding of potential effects of training and HRM on employees and the Organisation.
 - Understanding of the determinants of skills obsolescence.
 - Skills in of cost-benefit analysis on learning and development programs.

Generic competencies
 Scientific knowledge
 Awareness of broader context
 Academic reasoning
 Problem-solving skills
 Learning skills
 Self-management skills
 (International) communication skills
 Interpersonal and team-working skills
 Leadership
 Research skills

Description PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. THE INFORMATION PROVIDED HERE IS BASED ON THE COURSE SETUP PRIOR TO THE CORONAVIRUS CRISIS. AS A CONSEQUENCE OF THE CRISIS, COURSE COORDINATORS MAY BE FORCED TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS.

Why do people and firms invest in schooling? What are the implications of the diffusion of technological and organisational innovations on the skills demanded in the labour market and the match with the skills supplied? What are the costs and benefits of formal education and training and informal training for workers and firms? And what are the causes of skill obsolescence? All these questions are addressed in this course that aims to increase students' understanding of (1) the implications of labour market developments for both workers and firms, and (2) the effects of human capital investments and deterioration on workers' wages and employability, as well as the performance of organisations. This will enable students to understand the costs and benefits of generic and specific human capital development from a firm's perspective. Moreover, the course deals with the institutional context and the labour market developments related to life-long learning, e.g., how pension institutions affect the training participation of older workers and how technological change relates to changing skill demands. The course uses theoretical and empirical papers so that economic models are not only explained but also applied to questions of societal relevance. Students will thereby learn how to analyse empirical findings related to lifelong learning and how to evaluate empirical strategies.

Learning objectives

The course aims at the following learning objectives:

- * Understanding how people learn (nurture, nature, education, training, informal learning).
- * Understanding economic models related to lifelong learning.
- * Applying these economic models to questions of societal relevance (automation of work, ageing of the workforce).
- * Analyze empirical findings related to lifelong learning.
- * Evaluate empirical strategies to analyze the determinants and effects of lifelong learning.
- * Use economic models and empirical literature to solve questions related to the determinants and effects of lifelong learning.

As people also learn from feedback, we have an additional learning objective (non-graded formative assessment):

- * Provide productive feedback to peers.

Literature Various research papers from international journals

Prerequisites

Teaching methods PBL / Presentation / Lecture / Assignment

Assessment methods Final Paper / Attendance / Participation / Written Exam
