

# Course Descriptions Master 2020-2021

Course Title International Macroeconomics and Finance for Emerging Markets

Course Code EBC4244

ECTS Credits 5,0

Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
1	31-8-2020	16-10-2020	X		X		

Level Advanced

Coordinator Piet Eichholtz, Tania Treibich For more information: [p.eichholtz@maastrichtuniversity.nl](mailto:p.eichholtz@maastrichtuniversity.nl); [t.treibich@maastrichtuniversity.nl](mailto:t.treibich@maastrichtuniversity.nl)

Language of instruction English

Goals

- \* Critically analyse the theoretical sources of business fluctuations in emerging economies
- \* Examine fundamental issues in international finance both from an economics (role of interest and exchange rates, policy choices) and a business perspective (perspective of companies operating in a multi-country environment)
- \* Identify and interpret selected indicators of macroeconomic and financial performance
- \* Identify and interpret indicators of risk and volatility in order to assess macroeconomic and financial vulnerabilities and early warning systems for crises
- \* Know and understand instruments helping to manage these risks

Description

PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. THE INFORMATION PROVIDED HERE IS BASED ON THE COURSE SETUP PRIOR TO THE CORONAVIRUS CRISIS. AS A CONSEQUENCE OF THE CRISIS, COURSE COORDINATORS MAY BE FORCED TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS.

This course focuses on short-term economic fluctuations specific to emerging economies, which tend to have sharper run-ups in asset prices in boom times, but more severe crises when things go bad, be it in currencies, banking, or sovereign debt. The course provides insights in the indicators and yardsticks of risk and volatility in emerging markets, and policy and financial solutions to address them.

International macroeconomics concern the role of flows of capital, goods and people on macroeconomic performance. Yet, emerging economies' macroeconomic experience differs from developed countries', in particular they have been much more unstable and prone to crises (Montiel, 2011). Understanding the macroeconomic dynamics in emerging countries not only requires to focus on a specific set of issues, such as the role of financial liberalization, exchange rate determination and domestic capital reform, but also to reconsider the economic mechanisms at the source of business fluctuations (Aguar and Gopinath 2011). International finance builds on these issues. The business and financial fluctuations resulting from these macroeconomic fundamentals are fundamentally different in emerging markets relative to developed economies. A deep understanding of these risks is essential to business success in an emerging markets environment. Moreover, this understanding needs to be amended with knowledge of the working of instruments helping to manage these risks.

This course will combine the perspectives from Economics and Finance on these issues.

Literature

- \* P.J. Montiel (2011), Macroeconomics in Emerging Markets, Second edition, Cambridge University Press.
- \* K.C. Butler (2016), Multinational Finance, Sixth edition, Wiley.

Prerequisites

Exchange students need to have obtained a Bachelor degree in Business or Economics. Students are expected to understand the key basic concepts from macroeconomics and finance, as is taught in typical bachelor business and economics programs. Analytical skills, understanding of excel, and an advanced level of English are required.

Keywords

Teaching methods PBL / Presentation / Lecture / Assignment / Groupwork

Assessment methods Participation / Written Exam
