

Course Descriptions Bachelor 2022-2023

Course Title	Introduction to Business Engineering							
Course Code	BENC1001							
ECTS Credits	5,0							
Assessment	Whole/Half Grades							
Period	Period	Start	End	Mon	Tue	Wed	Thu	Fri
	1	5-9-2022	21-10-2022	X		X		L
Level	no level							
Coordinator	Lieven Quintens For more information:l.quintens@maastrichtuniversity.nl							
Language of instruction	English							
Goals	<p>In this course, students</p> <ul style="list-style-type: none">* demonstrate up-to-date academic knowledge that connects business to engineering and science* are aware of the ethical consequences of solutions to complex problems* connect business and engineering in solving complex problems* explain the complexity of contemporary management problems* understand and evaluate a complex business problem in the field of engineering* understand complexity of contemporary management problems and how these affect society* understand that a unity of knowledge beyond disciplines gives a better understanding of the present world							
Description	<p>PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. A RE-EMERGENCE OF THE CORONAVIRUS AND NEW COUNTERMEASURES BY THE DUTCH GOVERNMENT MIGHT FORCE COORDINATORS TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS.</p> <p>The aim of this course is to provide the foundation for business engineering. The student gets an overview of what it entails to become and to be a business engineer. Based on the societal needs of sustainability, big data/digitalisation and health/wellbeing, the course highlights the role of close cooperation between boardmen/women, scientists and engineers. The course will discuss the four fundamental functions of management: planning, organising, leading and controlling. In the course, students become familiar with the foundations of business engineering. This includes the relationship between engineering and management, planning and forecasting, managing research and development, managing engineering design, planning production activities, planning production operations, leadership as well as an introduction to marketing and cost calculations.</p>							
Literature	* Morse, L.C. and Babcock D.L. (2014). Managing engineering and technology, International Edition, Sixth Edition, Pearson, 512pp.							
Prerequisites	Not applicable.							
Keywords	Planning, organizing, engineering, process, marketing, costs, technology, sustainability							
Teaching methods	PBL / Presentation / Lecture / Assignment / Groupwork							
Assessment methods	Final Paper / Assignment							
Evaluation in previous academic year	For the complete evaluation of this course please click http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM							
This course belongs to the following programme / specialisation	Bachelor Business Engineering				Year 1 Compulsory Course(s)
